

TB-303 SERVICE NOTES

First Edition

SPECIFICATIONS

PATTERN MEMORY CAPACITY

64: 8 (PATTERN) x 2 (PATT. SECTION) x 4 (PATT. GROUP I, II, III, IV)

Contents: Pitch, Value, Accent, Slide

MINIMUM STEP

STEPS/measure

→ 1 to 16 steps (2, 3 or 4 meter)

→ 1 to 15 steps (2, 3, 4 or 5 meter)

Scale

3 octaves (PATTERN) w/TRANSCOPE

4 octaves (TRACK) w/Key shift

TRACK MEMORY CAPACITY

64 measures/TRACK Total 256 measures (64 x 7 TRACKS)

Contents: Pattern Order, TRANSCOPE, D.C. *

TUNING Control: approx. ±700 cents (perfect fifth)

TEMPO Control: (♩ = 40 to 300)

CONNECTIONS

Output: Impedance 10kΩ

Headphone: Impedance 8Ω to 30Ω

Gate Out: OFF: 0V; ON: +12V

CV Out: +1V to +5V (1 volt/oct)

SYNC In: DIN connector

MIX In: Impedance 100kΩ

Gain: Unity

POWER

6V: 1.5V battery x 4

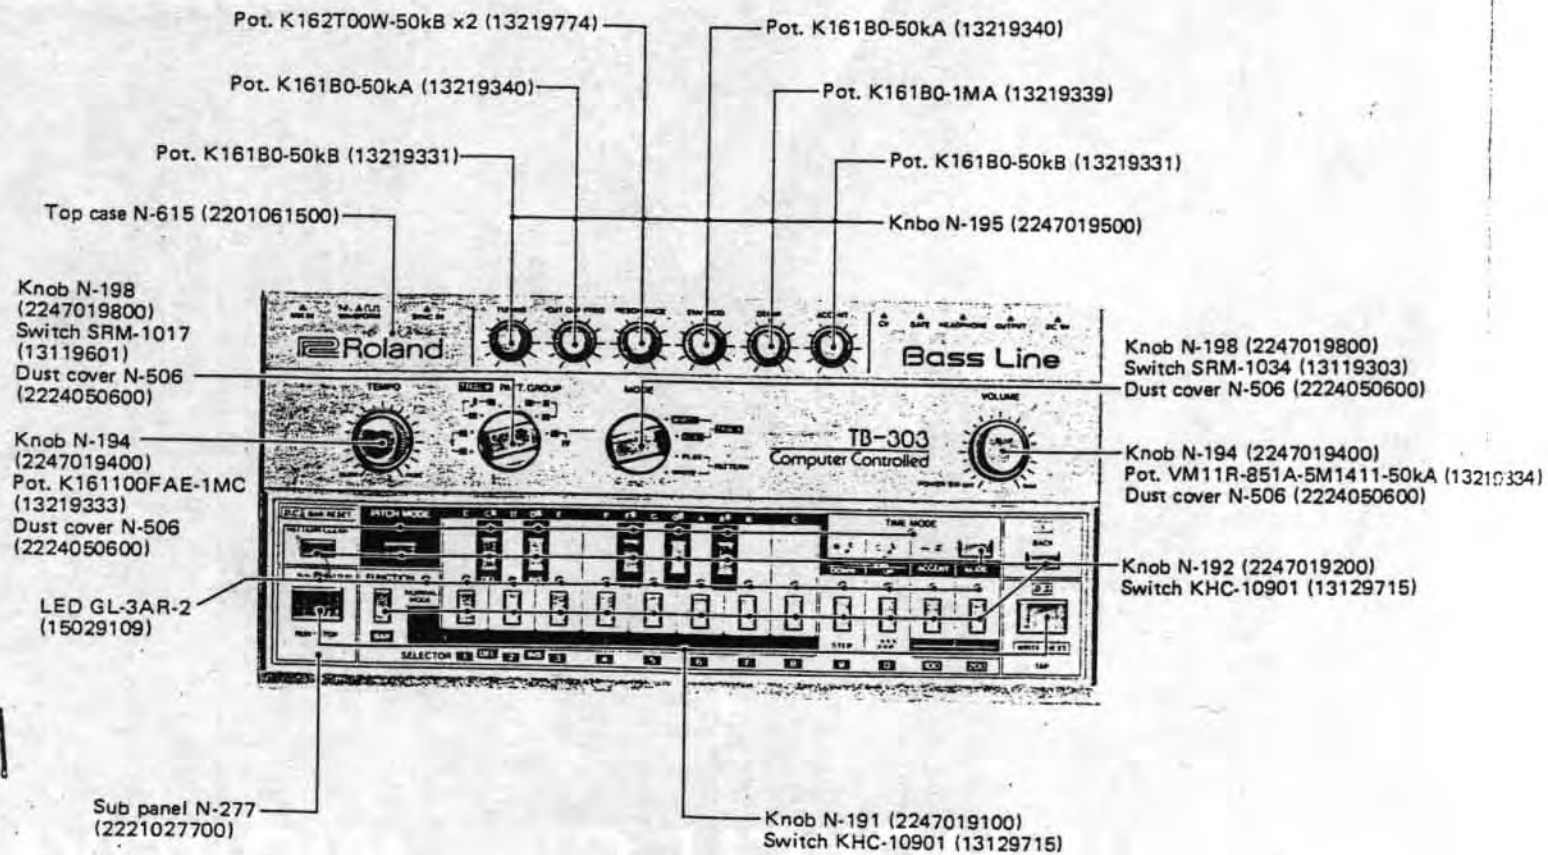

9V: AC adaptor

80mA to 120mA

Dimensions: 300(W) x 146(D) x 55(H) mm

Weight: 1.0 kg

READ "PRELIMINARY DIAGNOSIS" ON PAGE 7 BEFORE STARTING TROUBLESHOOTING

TB-303

POWER SUPPLY

TUNE : 110Hz (SET TUNING CV OUT: 2.75V(A KEY))
 WIDTH : 1 OCT/VOLT

ADJUSTMENT

Adjustments should be done from the component side.
Use digital voltmeter or oscilloscope, as appropriate.

TEMPO

Check point: TP1
Turn TEMPO full clockwise.
Adjust TM1 for:

INT CLOCK

Check point: TP2
Adjust TM2 for:

CAUTION:

The following adjustments will be done in PATTERN WRITE mode.
If existing rhythm patterns need to be restored, locate a PATTERN that contains no rhythms or the easiest ones to copy and write it down.

CV

Check point: CV out jack
With PITCH mode, press low C key and note the reading - CVL.
Press high C key, adjust TM6 for CVL+1.000V±3mV - CVM.
While holding down TRANSPOSE UP, press high C key, confirm that the reading is CVM+1.000±3mV.

View from component side

MAIN BOARD

OP3127-050

(pcb 291-502C)

SWITCH BOARD

OP3127-040

(7312704010)

(pcb 291-503C)

VCO
 Check point: Q28 source or S1 WAVE-FORM terminal.
 Set TUNE in its middle position.
 With PITCH mode. While tapping CL and CH keys alternately, adjust TM5 WIDTH for 2:1 waveforms:

Press A key and adjust TM4 for 110Hz.
 Confirm $4:1 \pm 0.5\%$ with CL and CH + TRANSPOSE UP.

VCF
 Check point: TP6
 Panel settings:
 CUTOFF FREQ : center
 WAVEFORM : SAWTHOOOTH
 RES : Full clockwise
 ENV MOD,
 DECAY, ACC : Full counterclockwise

Afdjust TM3 for:

View from foil side

PRELIMINARY DIAGNOSIS

BATTERY

First check the DC voltage.
 Most users are not so familiar with battery operated equipment as to suspect aged dry cells in the malfunctioning (silent) TB-303 when LEDs other than RUN/BATTERY are lit up.

MISOPERATION

The versatile TB-303 inevitably needs to be manipulated according to what is instructed in the TB-303 Owner's manual.
 Symptoms listed below are likely to be found (by the user) in a unit which will be returned for servicing, as an evidence of defect.
 Confirm the operation following to the steps described in the manual — on the page(s) referenced.

- * Patterns (especially note value) are not reproduced as they should be.
 " 4 TO WRITE YOUR OWN BASS LINE" PP. 49-64
- * Incorrect PATTERN selection
 "IMPORTANT NOTES" P. 3
- * The LED above the selected PATTERN switch does not flush
 " 2 Setting the STEP number" P. 53
 "b. WRITING A BASS PATTERN IN 3/4" PP. 55-57
- * TRACK fails to store data being written into it.
- * Phrases do not repeat in order in TRACK PLAY mode.
 "SELECTING THE TRACK" PP. 23-32
 "B. TO WRITE YOUR OWN BASS LINE" PP. 64-68
- * Melody does not run at the beginning of the 1st measure in TRACK PLAY mode.
 " 4 LET'S PLAY THE TRACK" PP. 31-32

VCF ENVELOPE MODULATION

In the conventional VCF configuration, envelope modulation voltages applied to modulation control voltage input of VCF rise from a fixed potential to their values regardless of shape and amount of envelope and fall back to the same potential. Fig. 1. In this setup, an attempt to deepen envelope modulation is increment of control voltage in one direction, only to open up filter. Resultants are; higher the control voltage input, longer the period of time cutoff point travels through higher frequency range in which significant aural sound characteristic changes do not occur, whereas notes are brightened.

To compensate for the limitation this impose, there is a gimmick in the TB-303 VCF circuit. The Q9 has a key role in this arrangement. See Fig. 2. It develops bias for Q10 and Q11 to set initial cutoff point at the center of frequency range. Within the range even a small amount of voltage change can create a appreciable modulation.

Fig. 1

Fig. 3

Fig. 2

Rotating wiper ② of VR5 closer to terminal ③ increases ENV MOD voltage being fed to base of Q10 while changing the bias which in turn lowers VCF cutoff frequency. See Fig. 3. This is equal to turning CUTOFF knob counterclockwise and, since Q10 and Q11 in combination convert control voltage to the current in anti-log fashion, the cutoff point stays in an effective frequency range for the most portion of envelope sweeping duration.

PARTS LIST

PANEL

2201061500	Top case	N615	top
2201061400	Bottom case	N-614	bottom
2202062300	Battery cover	N-623	
2202062400	Battery holder	N-624	
2221027700	Sub panel	N-277	

SOCKET

13429706	DIN connector	TCS0737-01-010	Sync
13449218	Jack	HLJ0305-01-030	MONO
13449217	Jack	HLJ0305-01-010	STEREO
13449401	Jack	SG8026	MINI
13449706	Adaptor jack	HEC0470-01-230	AC adaptor

TRANSFORMER COIL

12449217	IFT coil	S74230 (yellow)	CPU clock
