

FOR IMMEDIATE RELEASE:

Innovative and Extremely Versatile Compact Coax Cabinet from Yorkville Sound Being Revealed at InfoComm

Toronto Ontario, May 9, 2014 – Yorkville Sound unveils the extremely versatile and completely unique 600-watt NX10C full range cabinet just in time for InfoComm and Summer NAMM.

The innovative cabinet design allows the NX10C to act as a scalable Front-of-House solution, innovative side-fill cabinet, or monitor enclosure. Designed to be one of the most compact, most versatile cabinets in the NX Series, the powered 10-inch coaxial NX10C can be used in almost any live sound application.

The completely unique "through-cabinet" stand-mount design allows multiple NX10C cabinets to be mounted on a single standard speaker stand in a vertical array for very high volume applications. When wider horizontal coverage is required the NX10C cabinets can be rotated about the axis of the pole while still maintaining full phase coherency. Coverage for up to 360 degrees can be achieved. The NX10C can also be mounted under a conventional Front-of-House cabinet and oriented toward the artist, making it the ideal side-fill solution for tight stages.

The custom rear mounted handle operates as a tilt stand allowing the NX10C to be used as a compact wide coverage floor monitor or center fill cabinet.

Versatile inputs for mic or line level sources with individual volume controls as well as 1/8th-inch TRS jack allow the NX10C to direct connect to any audio source. The NX10C is made in Canada and will be covered by Yorkville Sound's two-year unlimited transferrable warranty.

NX10C – Compact Scalable Full Range Coaxial Cabinet will have a \$499.00 US MAP, and is shipping August 2014.
