NX200S

Overview

The NX200S is an ultra-compact powered subwoofer that features a single 10" speaker and a high headroom integrated power module. The precisely tuned band-pass enclosure of the NX200S provides rock-solid low frequency output previously available only from much larger cabinets. In fact, the unique combination of high-excursion woofers, electronic control and proprietary, series-loaded box design results in higher acoustic output than many single 18" enclosures which are 30-50% larger!

Yorkville's powered NX Series subwoofers reflect the synergistic advantage of integrating electronic and acoustic elements into one attractive package that is very versatile, transportable and, above all - great sounding! These enclosures offer the ultimate in 'plug and play' convenience while maximizing sonic performance. Advanced sensing circuitry offers sonically transparent limiting and thermal driver protection for maximum reliability.
